ACCADÉMIA

COLLECTION

Who We Are

Always engaged in the pursuit of good taste, unique and refined creations, Accademia Collection stands out for its high creative expression and specialization in design, manufacturing, installation, maintenance and restoration of inlaid woodworks. With the pride of a wide range of inlaid products designed specifically for the covering of floors, ceilings and boiserie.

Every single step from developing of design to final production among whit material research and quality control is 100% made in Italy in our factory

The Idea

The initial phase involves the covering design to be produced. Generally sketched in pencil and then drew with the help of software for assisted technical drawing, faithfully reproduce your idea.

There can be various type of themes, classic, floral, fantasy, geometric, etc. and our designer will follow your taste and suggestion.

Assembling

Medallion

Production

Proparq has advanced machinery and equipment to practice precision cutting of various types of materials. Strictly carried out by experts Italian artisans the assembling is the last step in the production phase.

The Assembling is performed in order to facilitate as much as possible the installation on site.

Not just a floor, but a way to express yourself adding value and style to your home enhancing it with something unique.
